

CNS-SM

For Immediate Release:

A NEW Panner Product!

pH neutralization systems with a modular approach.

Avoid costly installation and start-up costs. You could spend your time selecting and sizing equipment, or, you could let us do it for you. Panner offers a pre-assembled, pre-wired, and ready to go neutralization system.

The CNS-SM series of pH neutralization and adjustment systems are mounted on a corrosion resistant HDPE skid for ease of installation, and only requires power and piping to be run to the skid before start-up.

Features include chemical feed pumps, level control, mixer control panel, pH meters, recording device, and more options available upon request. Compliance can be made easy.
